Industrial Diamond Review

VOLUME 38 JANUARY to DECEMBER 1978 446 to 457

Key to page numbers

No.446	:January	:pp 1- 23	No.450	:May	:pp 159-181	No.454	:September	:pp 311-329
No.447	:February	:pp 41- 61	No.451	:June	:pp 199-221	No.455	:October	:pp 349-367
No.448	:March	:pp 81- 99	No.452	:July	:pp 239-259	No.456	:November	:pp 385-401
No.449	:April	:pp 119-141	No.453	:August	:pp 277-293	No.457	:December	:pp 421-443

AUTHORS' INDEX

B

Bahlke, E., Roth, M.
Finish machining of steel rolls with CBN and diamond wheels, 282

Bailey, M. W., Collin, W. D.
De Beers TITANIZED metal bond diamond grit and related investigations into the sawing of stone and concrete, 8

Balfour, A. M., Cooley, B. A.
De Beers AMBER BORON NITRIDE—predictions for wider applications, 437

Bursill, L. A., Hudson, P. R. W.
High resolution (3Å) phase contrast studies of defects in diamonds, Diamond Research '78, 11

C

Clark, C. D. *see* **Vermeulen, L. A., Clark, C. D., Parsons, B. J.**

Collin, W. D., *see* **Bailey, M. W., Collin, W. D.**

Collins, A. T.
Current research on natural semiconducting diamond, Diamond Research '78, 37

Cooley, B. A. *see* **Balfour, A. M., Cooley, B. A.**

D

Daniel, P.
Drilling in a tube deep below the waves, 321

Davies, G., Welbourn, C. M., Loubser, J. H. N.
Optical and electron paramagnetic effects in yellow type Ia diamonds, Diamond Research '78, 23

Dunnington, B. W.
Fine finishing with diamond, 432

E

Evans, S., Thomas, J. M.
Surface properties of diamond: some recent developments, Diamond Research '78, 31

Evans, T.
Changes produced in the distribution of nitrogen in diamond by high temperature-high pressure treatments, Diamond Research '78, 17

F

Forner, H.
Precision cutting of hard, brittle materials using diamond sawblades, 136

G

Gärtner, W., *see* **Geisweid, G., Gärtner, W.**

Geisweid, G., Gärtner, W.
Deep and oscillation grinding—temperatures and power requirements, 285

Grossjean, F.
Cemented carbide as a roll material, 425

H

Herbert, S.
CONSUB—a developing undersea technique, 1
Secrets of the Tower revealed, 41
CDA's contribution to the war on noise, 81
Modern methods in ceramics restoration, 95
The concrete 'surgeons' move in on Windscale, 159
Design Council honours the throwaway diamond, 166
The flexible diamond cost-saver, 199
High speed diamond—key to a growing business, 220
Diamond probes point the way ahead, 239
New developments meet at Rolls Royce, 253
Style with safety—an architect's design concept, 311
Nothing succeeds like success, 349
The specialists combine their expertise, 360
Made to measure—1978 style, 385
Cystoscope craftsmen cut their labour time, 398
A new arrival in the toolroom, 421

Hudson, P. R. W. *see* **Bursill, L. A., Hudson, P. R. W.**

Hujer, H.
Machining turbine parts—problem solving with diamond and CBN tooling, 430

J

Jeynes, C.
Natural polycrystalline diamond, 14

K

Köglmeier, W.
SYNDITE for machining fibre glass reinforced epoxy resin, 395

Kopp, O.
Diamond and CBN abrasives plus automation equals increased honing efficiency, 389

Kosick, M.
A better, more economical way to sharpen steel microtome knives, 256
A steady heart beat and pacemaker quality control, 352

L

Limerick, T. *see* **Wright, D., Limerick, T.**

Loubser, J. H. N. *see* **Davies, G., Welbourn, C. M., Loubser, J. H. N.**

M

Matusek, M., Sikola, C.
Diamond grinding of glass for costume jewellery, 172

N

Notter, A. T., Shafto. G. R.
Vertical spindle grinding with AMBER BORON NITRIDE in segmented cup wheels, 277

Notter, A. T., Wapler, H.
Fine grits in bonded applications, 87

Notter, A. T. *see* **Tomlinson, P. N., Notter, A. T., Penny, A. L.**

P

Panhorst, H.-J.
Deep drilling for oil and gas with diamond bits—status and development, 5

Parsons, B. J. *see* **Vermeulen, L. A., Clark, C. D., Parsons. B. J.**

Penny, A. L. *see* **Tomlinson, P. N., Notter, A. T., Penny, A. L.**

Plattner, H.
Primary sawing of granite with circular diamond blades, 244

R

Renard, P. A., Smith, L. I.
An innovative bond system extends the utility of CBN abrasives, 163

Roth, M. *see* **Bahlke, E., Roth, M.**

S

Sawluk, M.
Dressing peripheral High Efficiency grinding wheels with the roll-2-dress device, 48

Seal, M.
The increasing applications of diamond as an optical material and in the electronics industry, 130

Shafto, G. R. *see* **Notter, A. T., Shafto, G. R.**

Sikola, C. *see* **Matusek, M., Sikola, C.**

Silveri, P.
New technique speeds up placement of road markers, 44
Texturing treatments cure skid hazards, 98
Producing mirror finishes is an important technology, 119
Diamond wheels are key to quality lens output, 170
Grinding solves problem at Rock Island Dam, 248
New technique for installing reflective pavement markers, 364
Concrete repaving problem solved by diamond grinding, 388

Smith, L. I. *see* **Renard, P. A., Smith, L. I.**

Spielvogel, E.
Mechanical systems improve stone sawing productivity, 250

Spira, M .
Diamond tools and machines for today's optical glass industry, 84

Swan, R. J.
The latest uses of diamond powders in grinding and lapping, 46

T

Thomas, J. M. *see* **Evans, S., Thomas, J. M.**

Tomlinson, P. N.
New concepts in carbide grinding, 123

Tomlinson, P. N., Notter, A. T., Penny, A. L.
CDA–M : a new dry grinding abrasive for tungsten carbide, 204

V

Verbeeth, J.
Diamond drilling restores the balance after Dutch bridge accident, 318
Diamond sawing 'tops' church spire, 366
Vermeulen, L. A., Clark, C. D., Parsons, B. J.
Photo-Hall and Corbino measurements on irradiated semiconducting diamond, Diamond Research '78, 46

W

Wapler, H., *see* **Notter, A. T., Wapler, H.**
Weinz, E. A.
Shaping and polishing of diamond composite tooling, 355
Welbourn, C. M. *see* **Davies, G., Welbourn, C. M., Loubser, J. H. N.**
Wilks, E. M., Wilks, J.
The mechanical strength and reliability of natural diamonds, Diamond Research '78, 2
Wilks, J. *see* **Wilks, E. M., Wilks, J.**
Wöll, E.
Sawing asphalt with diamond, 212
Wright, D., Limerick, T.
Surface finish and diamond wheel efficiency in the edging of plate glass, 323

SUBJECT INDEX—PROCESSES

Core Drilling (In Civil Engineering)
CONSUB—a developing undersea technique, 1
De Beers TITANIZED metal bond diamond grit and related investigations into the sawing of stone and concrete, 8
The concrete 'surgeons' move in on Windscale, 159
Diamond drilling restores the balance after Dutch bridge accident, 318
Drilling in a tube deep below the waves, 321
De Beers completes the synthetic diamond grit range, 322
Drilling solves a safety problem, 442
Hydraulic powered core drill, 443
New Craelius 'Pixie' drill, 443

Dressing & Truing
Dressing peripheral High Efficiency grinding wheels with the roll-2-dress device, 48
Technology transfer is discussed at American manufacturing engineers meeting, 292
Dresser for form grinding, 329
Shaping and polishing of diamond composite tooling, 355
A new arrival in the toolroom, 421
De Beers AMBER BORON NITRIDE—predictions for wider practical applications, 437

Drilling (see also Core Drilling, Rock Drilling)
Jig-O-Matic glass drills, 57
Modern methods in ceramics restoration, 95
New method of drilling holes in diamond, 219
High speed diamond—key to a growing business, 220
Danger to operators reduced with chip deflectors, 363
Cystoscope craftsmen cut their labour time, 398

Engraving
High speed diamond—key to a growing business, 220

Grinding
The latest uses of diamond powder in grinding and lapping, 46
CDA's contribution to the war on noise, 81
Fine grits in bonded applications, 87
Dry carbide grinding performance boosted with CDA-M, 122
New concepts in carbide grinding, 123
An innovative bond system extends the utility of CBN abrasive, 163
Diamond wheels are key to quality lens output, 170
Diamond grinding of glass for costume jewellery, 172
CDA-M: a new dry grinding abrasive for tungsten carbide, 204
Wheel making development, 219
Grinding solves problem at Rock Island Dam, 249
New developments meet at Rolls Royce, 253
A better, more economical way to sharpen steel microtome knives, 256
Vertical spindle grinding with AMBER BORON NITRIDE in segmented cup wheels, 277
Finish machining of steel rolls with CBN and diamond wheels, 282
Deep and oscillation grinding—temperature and power requirements, 285
Preparing railroad steel for laboratory analysis, 290
Technology transfer is discussed at American manufacturing engineers meeting, 292
Polishing metal mirrors to 0·025 micron surface finish, 315

Surface finish and diamond wheel efficiency in the edging of plate glass, 323
Nothing succeeds like success, 349
A steady heartbeat and pacemaker quality control, 352
New A.I.T. plant, 354
Shaping and polishing of diamond composite tooling, 355
Huffman HS-4 numerically controlled cutter grinder, 363
Danger to operators reduced with chip deflectors, 363
De Beers announce new high strength metal bond grit, 393
Throw-away insert grinding machine, 394
Cemented carbide as a roll material, 425
Machining turbine parts—problem solving with diamond and CBN tooling, 430
De Beers AMBER BORON NITRIDE for wider practical applications, 437

Honing
Technology transfer is discussed at American manufacturing engineers meeting, 292
Diamond and CBN abrasives plus automation equals increased honing efficiency, 389

Inspection, Measuring Techniques, Quality Control
R-F DDI reveals surprising hole deviations, 57
Clipper lightweight range of transformers, 57
Diamond grinding of glass for costume jewellery, 172
Preparing railroad steel for laboratory analysis, 290
Surface finish and diamond wheel efficiency in the edging of plate glass, 323
A steady heart beat and pacemaker quality control, 352
Made to measure—1978 style, 385
ESEWAY hardometer, 394
Circular-geometry gauge, 443

Lapping & Polishing
Secrets of the Tower revealed, 41
The latest uses of diamond powders in grinding and lapping, 46
Diamond tools and machines for today's optical glass industry, 84
Fine grits in bonded applications, 87
Design Council honours the throwaway diamond, 166
The flexible diamond cost-saver, 199
A better more economical way to sharpen steel microtome knives, 256
Preparing railroad steel for laboratory analysis, 290
Technology transfer is discussed at American manufacturing engineers meeting, 292
Polishing metal mirrors to 0·025 micron surface finish, 315
A steady heart beat and pacemaker quality control, 352
Shaping and polishing of diamond composite tooling, 355
The specialists combine their expertise, 360
Made to measure—1978 style, 385
Fine finishing with diamond, 432

Milling (of stone)
Style with safety—an architect's design concept, 311

Non-Cutting Applications (Styli, Gauge Points, Heat Sinks, etc)
The increasing applications of diamond as an optical material and in the electronics industry, 130
Technology transfer is discussed at American manufacturing engineers meeting, 292
Circular-geometry gauge, 443

Optical machining, Lens machining
Diamond tools and machines for today's optical glass industry, 84
Design council honours the throwaway diamond, 166
Diamond wheels are key to quality lens output, 170
The flexible diamond cost-saver, 199
Surface finish and diamond wheel efficiency in the edging of plate glass, 323
The specialists combine their expertise, 360
Olympus stereoscopic microscope series VM, 363
Cystoscope craftsmen cut their labour time, 398

Polishing *see* **Lapping and Polishing**

Rock Drilling
CONSUB—a developing undersea technique, 1
Deep drilling for oil and gas with diamond bits—status and development, 5
R-F DDI reveals surprising hole deviations, 57
Diamond probes point the way ahead, 239
Drilling in a tube deep below the waves, 321
New hydraulic trailer drill, 329
Mobile B53 Explorer drilling rig, 394

Sawing & Safety Grooving (of Concrete etc, also 'Bump Cutting' & Concrete Planing)
De Beers TITANIZED metal bond diamond grit and related investigations into the sawing of stone and concrete, 8
New technique speeds up placement of road markers, 44
Fastest groover in the West, 58
Texturing treatments cure skid hazards, 98
Belgians adopt diamond sawing for rapid Autoroute repair, 135
The concrete 'surgeons' move in on Windscale, 159
Sawing relieves stresses in Dutch Congress Building, 169
Sawing asphalt with diamond, 212
Grinding solves problem at Rock Island Dam, 248
Erasing paint from runways, 288
Amusement park steps are made safer, 289
Textured intersections .educe skid accidents, 320
30 h.p. diesel concrete saw, 329
New technique for installing reflective pavement markers, 364
Concrete repaving problem solved by diamond grinding, 388
Drilling solves a safety problem, 442

Sawing (Materials other than Concrete)
De Beers TITANIZED metal bond diamond grit and related investigations into the sawing of stone and concrete, 8
Fine grits in bonded applications, 87
The precision cutting of hard, brittle materials using diamond sawblades, 136
Sawing asphalt with diamond, 212
Primary sawing of granite with circular diamond blades, 244
Mechanical systems improve stone sawing productivity, 250
Costly carbon electrodes are salvaged by diamond sawing technique, 258
Preparing railroad steel for laboratory analysis, 290
Style with safety—an architect's design concept, 311
De Beers completes the synthetic diamond grit range, 322
A steady heart beat and pacemaker quality control, 352
Diamond sawing 'tops' church spire, 366
Cystoscope craftsmen cut their labour time, 398

Screening of Powders, Particle Size Analysis, Recovery
Technology transfer is discussed at American manufacturing engineers meeting, 292

Turning & Boring (also Fly-Cutting, Milling of Metals, etc)
Producing mirror finishes is an important technology, 119
Danger to operators reduced with chip deflectors, 363
SYNDITE for machining fibre glass reinforced epoxy resin, 395
Cemented carbide as a roll material, 425
Machining turbine parts—Problem solving with diamond and CBN tooling, 430

Wire Drawing
New method of drilling holes in diamond, 219
Cemented carbide as a roll material, 425

SUBJECT INDEX—WORKPIECE MATERIALS

Abrasives (other than Diamond)
An innovative bond system extends the utility of CBN abrasive, 163
Wheel making developments, 219

Aluminium *see* **Non-Ferrous Metals**

Asphalt *see* **Concrete & Asphalt**

Biological Specimens
A better, more economical way to sharpen steel microtome knives, 256

Brass *see* **Non-Ferrous Metals**

Brick *see* **Masonry, Refractories**

Carbide *see* **Tungsten Carbide**

Carbon
Costly carbon electrodes are salvaged by diamond sawing technique, 258

Ceramics
Fine grits in bonded applications, 87
Modern methods in ceramics restoration, 95
The precision cutting of hard, brittle materials using diamond sawblades, 136
New developments meet at Rolls Royce, 253

Concrete & Asphalt
De Beers TITANIZED metal bond diamond grit and related investigations into the sawing of stone and concrete, 8
New technique speeds up placement of road markers, 44
Fastest groover in the West, 58
Texturing treatments cure skid hazards, 98
Belgians adopt diamond sawing for rapid Autoroute repair, 135
The concrete 'surgeons' move in on Windscale, 159
Sawing relieves stresses in Dutch Congress Building, 169
Sawing asphalt with diamond, 212
Grinding solves problem at Rock Island Dam., 248
Erasing paint from runways, 288
Amusement park steps made safer, 289
Diamond drilling restores the balance after Dutch bridge accident, 318
Textured intersections reduce skid accidents, 320
New hydraulic trailer drill, 329
30 h.p. diesel concrete saw, 329

New technique for installing reflective pavements markers, 364
Concrete repaving problem solved by diamond grinding, 388
Drilling solves a safety problem, 442
Hydraulic powered core drill, 443
New Craelius 'Pixie' drill, 443

Copper *see* **Non-Ferrous Metals**

Crystals, Minerals
Fine grits in bonded applications, 87
The precision cutting of hard, brittle materials using diamond sawblades, 136

Diamond
Natural polycrystalline diamond, 14
New concepts in carbide grinding, 123
The increasing application of diamond as an optical material and in the electronics industry, 130
CDA-M : a new grinding abrasive for tungsten carbide, 204
New method of drilling holes in diamond, 219
Wheel making developments, 219
De Beers completes the synthetic diamond grit range, 322
New synthetic diamond abrasive for the toughest applications, 393

Ferrite *see* **Ceramics**

Ferrous Metals *see* **Steel**

Glass
'JIG-O-MATIC' glass driller, 57
Diamond tools and machines for today's optical glass industry, 84
Fine grits in bonded applications, 87
The precision cutting of hard, brittle materials using diamond sawblades, 136
Diamond wheels are key to quality lens output, 170
Diamond grinding of glass for costume jewellery, 172
High speed diamond—key to a growing business, 220
New developments meet at Rolls Royce, 253
Technology transfer is discussed at American manufacturing engineers meeting, 292
Surface finish and diamond wheel efficiency in the edging of plate glass, 323
The specialists combine their expertise, 360
Cystoscope craftsmen cut their labour time, 398

Gold *see* **Non-Ferrous Metals**

Granite *see* **Stone**

Graphite *see* **Crystals, Minerals, Carbon**

Iron *see* **Steel**

Limestone *see* **Stone**

Marble *see* **Stone**

Masonry, Refractories
De Beers TITANIZED metal bond diamond grit and related investigations in the sawing of stone and concrete, 8
Sawing relieves stresses in Dutch Congress Building, 169
De Beers completes the synthetic diamond grit range, 322
Diamond sawing 'tops' church spire, 366

Non-Ferrous Metals
Producing mirror finishes is an important technology, 119
Polishing metal mirrors to 0·025 micron surface finish, 315
Machining turbine parts—problem solving with diamond and CBN tooling, 430

Plastics (including GRP)
Producing mirror finishes is an important technology, 119
The flexible diamond cost saver, 199
A steady heart beat and pacemaker quality control, 352
SYNDITE for machining fibre glass reinforced epoxy resin, 395

Quartz
The precision cutting of hard, brittle materials using diamond sawblades, 136

Reconstituted Stone *see* **Stone**

Refractories *see* **Masonry, Refractories**

Rock
CONSUB—a developing undersea tedhnique, 1
Deep drilling for oil and gas with diamond bits—status and development, 5
Drilling in a tube deep below the waves, 321

Semi-Precious Stones
The precision cutting of hard, brittle materials using diamond sawblades, 136

Slate *see* **Stone**

Steel (including Iron, Ferrous Metals)
Secrets of the Tower revealed, 41
An innovative bond system extends the utitity of CBN abrasive, 163
A better, more economical way to sharpen steel microtome knives, 256
Vertical spindle grinding with AMBER BORON NITRIDE in segmented cup wheels, 277
De Beers AMBER BORON NITRIDE—predictions for wider practical applications, 437

Stone
De Beers TITANIZED metal bond diamond grit and related investigations into the sawing of stone and concrete, 8
Diamond probes point the way ahead, 239
Primary sawing of granite with circular diamond blades, 244
Mechanical systems improve stone sawing productivity, 250
Style with safety—an architect's design concept, 311

Tungsten Carbide
The latest uses of diamond powders in grinding and lapping, 46
CDA's contribution to the war on noise, 81
Fine grits in bonded applications, 87
Dry carbide grinding performance boosted with CDA-M, 122
New concepts in carbide grinding, 123
CDA-M : a new dry grinding abrasive for tungsten carbide, 204
Deep and oscillating grinding—temperatures and power requirements, 285
Technology transfer is discussed at American manufacturing engineers meeting, 292
Nothing succeeds like success, 349
Made to measure—1978 style, 385
Cemented carbide as a roll material, 425

SUBJECT INDEX—MISCELLANEOUS

Conferences, Seminars, Exhibitions, Visits
International conventions in Manila and London highlight De Beers world-wide promotional activity, 60
Athens seminar for toolmakers, 203
Industrial Diamond seminar in Tel Aviv, 221
Technology transfer is discussed at American manufacturing engineers meeting, 292
30th Anniversary of the IDA of Japan, 435

Properties of Diamond and Cubic Boron Nitride (CBN)
Natural polycrystalline diamond, 14
Fine grits in bonded applications, 87
Dry grinding performance boosted with CDA-M, 122
New concepts in carbide grinding, 123
The increasing applications of diamond as an optical material and in the electronics industry, 130
An innovative bond system extends the utility of CBN abrasive, 163
Design Council honours the throwaway diamond, 166
CDA-M : a new dry grinding abrasive for tungsten carbide, 204
Vertical spindle grinding with AMBER BORON NITRIDE in segmented cup wheels, 277
Shaping and polishing of diamond composite tooling, 355
Diamond and CBN abrasives plus automation equals increased honing efficiency, 389
De Beers announce new high strength metal bond grit, 393
SYNDITE for machining fibre glass reinforced epoxy resin, 395
Fine finishing with diamond, 432
De Beers AMBER BORON NITRIDE—predictions for wider practical applications, 437

The mechanical strength and reliability of natural diamonds, Diamond Research '78, 2
High resolution (3Å) phase contrast studies of defects in diamonds, Diamond Research '78, 11
Changes produced in the distribution of nitrogen in diamond by high temperature-high pressure treatment, Diamond Research '78, 17
Optical and electron paramagnetic effects in yellow type 1a diamonds, Diamond Research '78, 23
Surface properties of diamond: some recent developments, Diamond Research '78, 31
Current research on natural semiconducting diamond, Diamond Research '78, 37
Photo-Hall and Corbino measurements on irradiated semiconducting diamond, Diamond Research '78, 46
